

Canadian Independent Schools Insurance Collective (CISIC)

An Insurance Buying Group Built for You

You Deserve Better

Canadian independent schools deserve equitable insurance protection. Axis and a group of forward-thinking Canadian independent schools created an insurance collective to provide you with access to specialized coverages and competitive premiums.

The Need for Equity

Without a dedicated collective, Canadian independent schools are often left accessing the open insurance market through a broker or agent. Without specialized knowledge and group purchasing power, the resulting policies can leave major gaps in coverage while costing you more in premiums.

Common gaps in coverage for independent schools in Canada:

- **Business Interruption**
Provides income replacement if operations are suspended due to a covered event, such as fire or flood
- **Student Tuition**
Provides reimbursement when a student is unable to complete an academic term due to an unforeseen, covered reason, like accident or injury
- **Educators' Errors and Omissions**
Protects educational institutions and their staff from legal and financial consequences stemming from alleged mistakes, negligence, or failure to perform their duties correctly related to errors in service, failure to supervise, misrepresenting qualifications, or improper discipline
- **Management Liability**
Protects a school and its leaders from financial loss due to lawsuits alleging wrongful acts, mismanagement, or failure to comply with regulations, and elements of this coverage protect against claims of wrongful management practices

A Powerful Solution

The Axis team built this exclusive insurance collective to deliver important solutions with competitive prices. With a group-buying approach, insurers price coverage as though all participating schools were a single account, which has a real impact on premiums. Together, we create a powerful voice and a long-term insurance solution.

Join a select group of leading Canadian independent schools benefiting from **combined purchasing power**.
